THAT'S INTERESTING?

Acrylic screens for counter tops and desks help protect your employees while serving customers. When installed these screens provide protection from germs and air borne particles, while allowing customers to make payments using the payment windows.

The counter top screens are designed to be free standing however come complete with pre-drilled tabs so they can either be mechanically fixed in place with screws or secured with D/S tape.

Hanging screen comes with chrome cable fixing kits, which will need to be fixed to the ceiling above the serving area

BARRIER SYSTEMS

MODULAR HYGIENE SCREENS

Modular Hygiene Screens

Keep your distance with your clients. Clear hygiene barriers made of acrylic and aluminium will help to keep a distance and protect from any airborne particles. They can be placed next to each other to cover wider desks or cahiers.

All of our modular kits are re-usable, disassembled, reassembled, moved and repositioned easily.

All of our modular kits can be delivered nationally and are easily self assembled in minutes.

A more robust “turn key” solution, that has multiple uses.

System is completely modular so all products can be redesigned to custom sizes, colour, branding etc. please contact us for your requirements.

P_03

Public Health England **Cleaning and disinfection guidance**

If you have a or new and continuous cough or high temperature

stay at home for 7 days, if you live alone
stay at home for 14 days, if you live with others, including all household members

Only use NHS 111 if your symptoms get worse or are no better after home isolation

Stop the spread of coronavirus

Wash your hands more often and for 20 seconds

Use soap and water or a hand sanitiser when you:

- Get home or into work
- Blow your nose, sneeze or cough
- Eat or handle food

Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze and throw the tissue away straight away

Cleaning an area with regular household disinfectant after someone with suspected coronavirus has left will reduce the risk of passing the infection on to other people

The amount of virus living on surfaces will reduce significantly after **72 hours**

If an area can be kept closed and secure, wait until this time has passed before cleaning

Wherever possible, wear disposable or washing up gloves and aprons for cleaning. These should be double bagged, then stored securely for 72 hours then thrown away in the regular rubbish after cleaning is finished

If an area has been heavily contaminated, such as with visible bodily fluids, from a person with coronavirus, consider using protection for the eyes, mouth and nose as well as gloves and apron

Using a disposable cloth, first clean hard surfaces with warm soapy water

Then disinfect these surfaces with the cleaning products you normally use. Pay particular attention to frequently touched areas and surfaces, such as bathrooms, grab-rails in corridors and stairwells and door handles

Wash hands regularly with soap and water, and after removing gloves, aprons and other protection used whilst cleaning

HM Government **NHS**

CORONAVIRUS

Have you been to an affected place in the last 14 days

or

had contact with somebody with Coronavirus,

and

do you have any of these symptoms?

If yes, to protect yourself and others please go home and call NHS 111 for expert advice.

Do not enter this building
